

At AxA Group innovation and products improvement are a daily challenge.

Our engineering team works really hard to improve the performance of our cranes in order to offer the best possible solutions to our distributors and their customers.

If you missed the last Logimat show in Germany, please go through the next pages and meet our latest models, especially the full electric 1.000 kg swivel crane Flex G1000DB.

Detailed information will be available soon at www.flexlifting.com.

Thanks for your attention

**FLEX G1000DBL
FLEX G1000DBR**

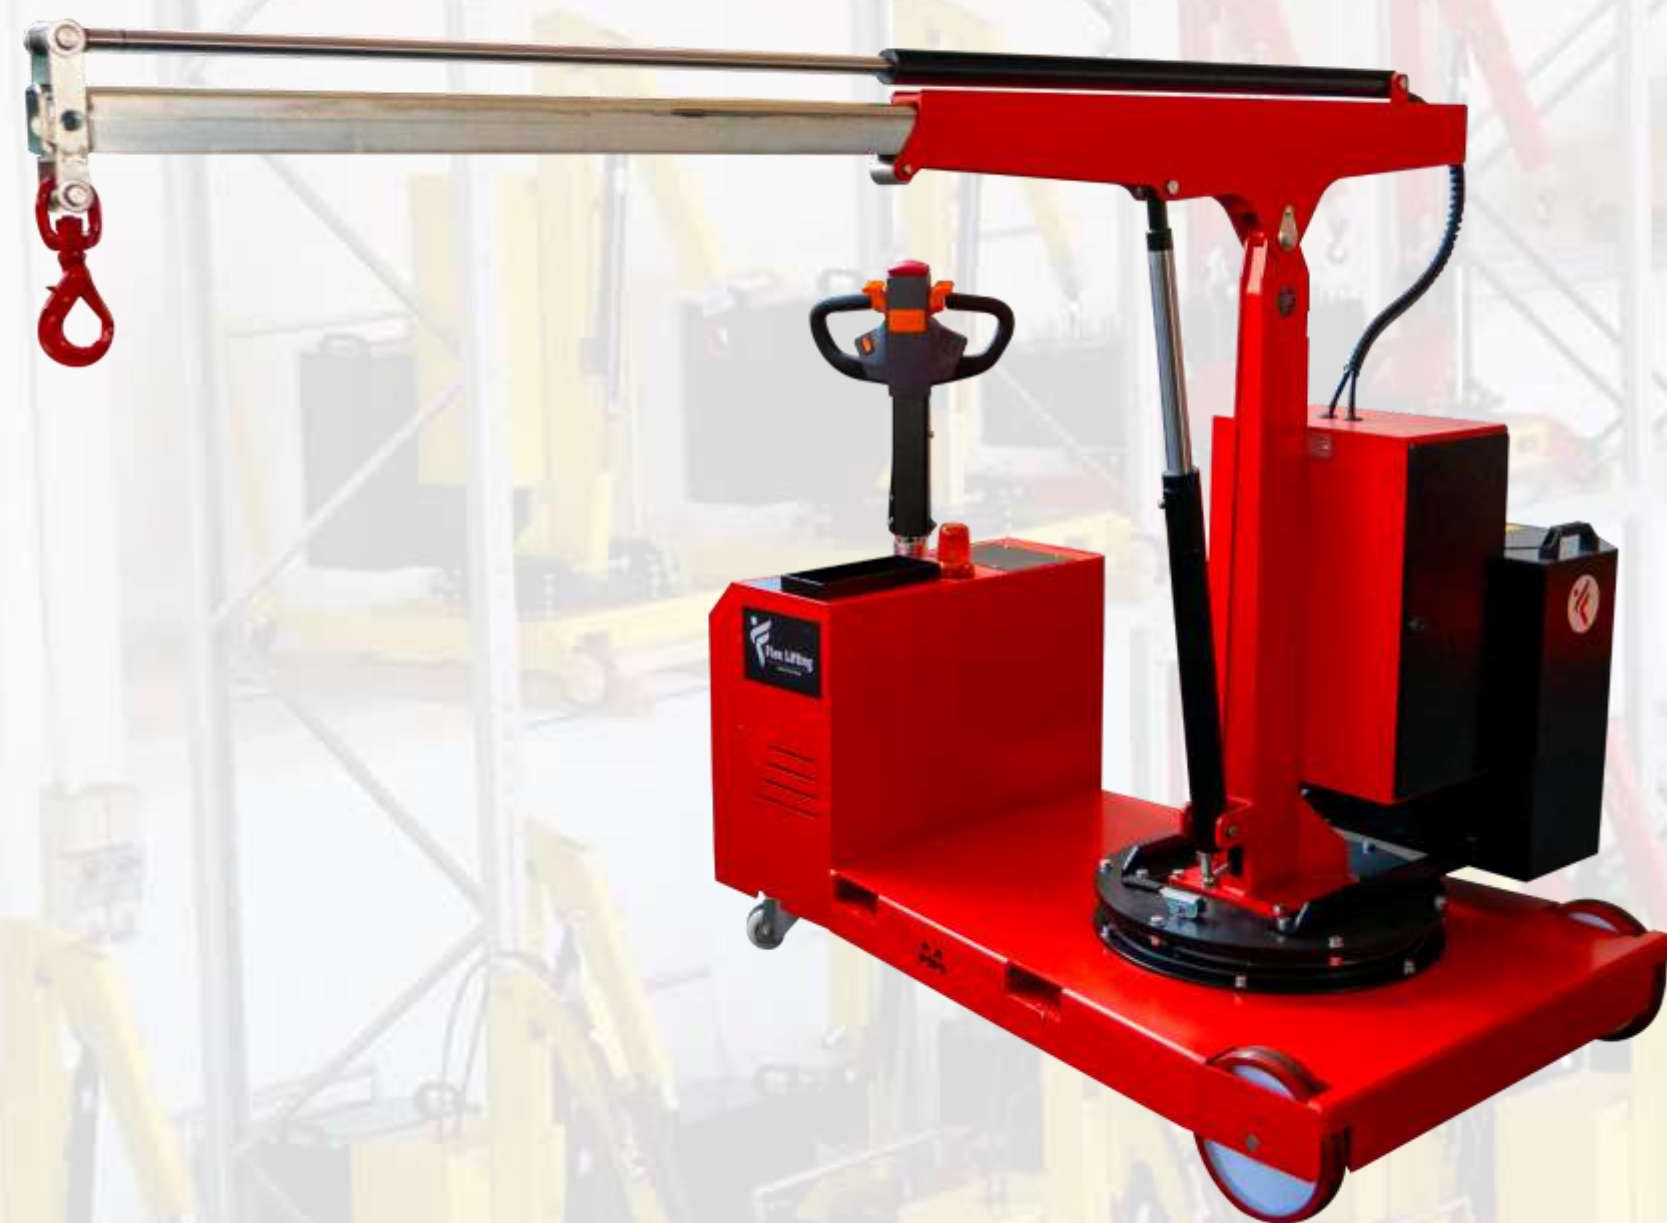

220° ROTATION

- The **NEW** Flex G1000DBL is an electric driven **swivel** crane with **1 ton** lifting capacity.
- All movements of the jib arm are lever controlled, rotation included.
- Double telescopic electric boom.
- Available also **with remote control**. Meet our model Flex G1000DBR that will be available soon at www.flexlifting.com.
- Optional compact ballast available that make it possible not to exceed the 1000 mm width of the crane during the rotation of the lifting arm.

**FLEX G500SBL
FLEX G500SBR**

270° ROTATION

- The crane model Flex G500SB will be now Flex G500SBL (L stands for lever controlled).
- Available also **with remote control**. Meet our model Flex G500SBR that will be available soon at www.flexlifting.com.

**FLEX F1000SBL
FLEX F1000SBR**

- The crane model Flex F1000SB will be now Flex F1000SBL (L stands for lever controlled).
- The crane will be delivered from now on with standard **electric controlled single boom** only and without the mechanical extension.
- Available also **with remote control**. Meet our model Flex F1000SBR that will be available soon at www.flexlifting.com.

**FLEX F1000DBL
FLEX F1000DBR**

- The **NEW** crane model Flex **F1000DBL** is an electric driven crane with **rigid arm, electric controlled double boom** and **1 ton** lifting capacity.
- All movements of the jib arm are lever controlled.
- Available also **with remote control**. Meet our model Flex F1000DBR that will be available soon at www.flexlifting.com.
- For both version a mechanical optional extension of the jib arm will be available on demand to get approx. 3 meters overhang.

Load platform

- An optional load platform is now available for our crane models Orbit 500EL, Orbit 500ER, Flex G500SBL, Flex G500SBR, Flex G1000DBL and Flex G1000DBR.
- The ideal accessory to lay down and secure the load and prevent its oscillation while moving the crane.
- Available soon at www.flexlifting.com

Front light

- An optional on/off front light is now available for our crane models Flex G500SBL, Flex G500SBR, Flex G1000DBL, Flex G1000DBR, Flex F1000SBL, Flex F1000SBR, Flex F1000DBL and Flex F1000DBR.
- The ideal accessory to ensure greater safety and visibility in low light environments.
- Available soon at www.flexlifting.com

01M5AISI

360° ROTATION

- The stainless steel crane 01M3AISI with 300 kg capacity will be replaced by the new model 01M5AISI with an increased capacity of 500 kg.
- Standard delivered with extended jib arm.
- Available soon at www.flexlifting.com

01B2SE_1000

360° ROTATION

- The crane 01B2SE will be now model **01B2SE_1000**.
- Electric controlled jib arm with **1000 mm stroke**.
- Price and technical specifications remain unchanged.
- Available soon at www.flexlifting.com.

01B2SE_400

360° ROTATION

- Electric controlled jib arm with **400 mm stroke**.
- 1312 mm overhang with optional extension.
- 2860 mm max lifting height.
- Available soon at www.flexlifting.com.

01B5SE_1000

360° ROTATION

- The crane 01B5SE will be now model **01B5SE_1000**.
- Electric controlled jib arm with **1000 mm stroke**.
- Price and technical specifications remain unchanged.
- Available soon at www.flexlifting.com.

01B5SE_400

360° ROTATION

- Electric controlled jib arm with **400 mm stroke**.
- 1312 mm overhang with optional extension.
- 2860 mm max lifting height.
- Available soon at www.flexlifting.com.
